CommandFusion and D-Tools Forge Partnership

Submitted by [Jill Reddy](#) on 10/04/2012 – 11:14 am[No Comment](#)

D-Tools enhances Manufacturer Vantage Point (MVP) program through Partnership with CommandFusion, offering current System Integrator users detailed information about their product line.

CONCORD, CA. October 04, 2012 — D-Tools, Inc, the worldwide leader in system integration software, today announced that CommandFusion, has joined the D-Tools Manufacturer Vantage Point (MVP) program.

Headquartered Melbourne, Australia, and founded in 2005, CommandFusion manufacturers automation software and hardware that is powerful, reliable and affordable.

CommandFusion released iViewer on the Apple AppStore in 2008 and has since gained a strong following and reputation for its ability to communicate with any Ethernet capable device and dynamically interpret any device feedback into useful data such as button states, text or gauge levels via a combination of Regular Expressions and JavaScript.

"We take great lengths to ensure that we provide a product that caters to flexibility, reliability, interoperability as well as to the future needs of our clients," said Aaron Green, Business Development Manager for CommandFusion. "We confidently stand behind our products as well as the customer service that we provide and we look forward to extending this confidence to D-Tools user-base by providing them our product info free-of-charge."

The D-Tools Manufacturer Vantage Point (MVP) program is designed to help provide system integrators with the most up-to-date product information to over 4,400 companies using D-Tools System Integrator software. D-Tools MVP members are dedicated to helping companies streamline the design process and making it easier for system integrators and installers to provide accurate proposals to their clients.

"CommandFusion is a recent frontrunner in the automation software/hardware industry and we are pleased to partner up with such a forward-thinking company" said Adam Stone, President of D-Tools. "We admire the fact that in addition to creating reliable hardware and software, CommandFusion also places great emphasis on providing their client community with exceptional customer service and support tools. We have no doubt that this partnership will truly be a win-win for our respective companies and mutual clients."

About CommandFusion
Founded in Melbourne, Australia in 2005 as GuiLink then renamed CommandFusion in 2011, the company has been selling it's flagship software product (CommandFusion iViewer) for iOS since 2008. Renowned for its flexibility and versatility, iViewer is now available for both iOS and Android platforms. The company has been working on the hardware product line since 2008 and was launched in May 2012. With a small, dynamic and driven international team made up of individuals from the automation, software and hardware fields, CommandFusion strives to offer the best support and fastest innovation turnaround in the industry.
